

When the back annoys

SO THAT BACK PAIN WILL SOON BE A THING OF THE PAST.

For diet management of spinal syndrome, nerve pain and polyneuropathies.

Doloctan® forte is not a drug, but a food for special medical purposes (balanced diet). The special composition was designed to meet the special nutritional needs of spinal syndrome, nerve pain or polyneuropathies. This nutritional medical approach to balanced diets is used to support the treatment of these diseases.

WHEN YOUR BACK ANNOYS

In the case of back pain, the physiological balance between nerves, muscles and bones is often affected and impaired by for example wrong postures, lack of movement or mental stress.

The result: Irritated or damaged peripheral nerve endings. Mechanical pressure on the nerves and degeneration of the spine, injuries, metabolic disorders (such as diabetes), alcohol consumption, viral infections or infections lead to irritation and ultimately to nerve pain.

REPAIR MECHANISMS

Damaged nerves are repairable. Therefore the organism, needs enough nutrients. Only then it can activate the body's own repair mechanisms. This is exactly where **Doloctan® forte** comes into play. It combines the neurotropic micronutrients

- Uridinmonophosphat (UMP)
- Aktive Folsäure in Form von Folat und
- Vitamin B12 als Methylcobalamin.

These substances have key functions in the activation of nerve regeneration. To ensure that the body absorbs this, **Doloctan® forte** contains exclusively body identical and bio-active substances. At the same time, they show a good tolerance without interactions with other substances.

Uridine monophosphate (UMP) is as an essential component of the nucleic acids responsible for the generation of new RNA in the organism, also in cases of nerve damage. It also stimulates protein biosynthesis and accelerates the regeneration of neuronal membranes.

The two B-vitamins folate (bioactive form of folic acid) and B12 work very closely in the body and play an essential role in nerve metabolism. B12, for example, is involved in the generation of the myelin layer (protective shell of the nerve cell).

WHAT MAKES **Doloctan® forte** SPECIAL?

With **Doloctan® forte** we consciously rely on a careful selection of vital substances. Through the use of patented folic acid (Quatrefolic®), which is biologically active and natural, a higher bioavailability is achieved. Also individuals who lack the enzyme for stimulation in the body, can easily and quickly metabolise the important vitamin. As vitamin B12 source we use methylcobalamin, the natural and bioactive form with fast absorption and direct utilization.

This is the only way to activate the body's own nerve regeneration through a nutritional approach.

ALL BENEFITS OF **Doloctan® forte** AT A GLANCE:

- Specially balanced bioactive body identical nerve components
- Only 1 capsule per day
- Without artificial colouring, flavourings and preservatives
- Without magnesium stearate
- Also suitable for vegans

INGREDIENTS

Filler microcrystalline cellulose, sodium salts of uridine monophosphate, hydroxypropylmethylcellulose (capsule), vitamin c, (6S)-5-methyltetrahydrofolate glucosamine salt (Quatrefolic®, active folic acid), methylcobalamin (vitamin B12).

RECOMMENDED CONSUMPTION

1 capsule daily with sufficient liquid (approx. 200 ml). A longer-term and regular intake is recommended. The capsule can also be opened if required and the powder can be consumed directly.

IMPORTANT NOTE

Food for special medical purposes. Use under medical supervision. Do not exceed daily dose. Not suitable for use as sole source of food. Keep out of the reach of children.

NUTRITIONAL DETAILS	PER 100 g	PER CAPSULE**
