

Doloctan® forte

So that healthy nerves become
part of everyday life.

CONSUMER INFORMATION

Doloctan® forte is a dietary supplement whose composition specifically supports the nerves in their healthy function and at the same time ensures healthy and natural cell division.

FOR NERVES AND CELL DIVISION

Discover the clever synergy of uridine monophosphate (UMP) and the essential vitamins folic acid (folate) and B12, which was developed to specifically support the healthy function of your nerves¹. The carefully selected nutrients also contribute to healthy cell division² and thus provide fundamental support for the continuous natural regeneration of cells in the body. Rely on **Doloctan® forte** and provide your nervous system and cells with the nutrients they need for healthy function.

Doloctan® forte

Food supplement with uridine monophosphate, active folate and vitamin B12

BIOLOGICAL SIGNIFICANCE

Vitamin B12 and folate are two crucial micronutrients that work closely together in the human body. Both are involved in numerous biochemical processes, particularly DNA synthesis and repair. These functions are essential for cell division, as cells need to replicate their DNA before they can divide. Vitamin B12 and folate work synergistically to ensure that cell division takes place properly and efficiently, and vitamin B12 also plays a crucial role in the proper functioning of our nervous system. It plays a key role in the synthesis of myelin, a protective layer of fat that surrounds the nerve fibers. Myelin acts like an insulating layer around electrical cables and enables the fast and efficient transmission of nerve impulses between different parts of the body.

Doloctan® forte contains only body-identical and bioactive substances. At the same time, they are well tolerated without interacting with other substances.

¹ Vitamin B12 contributes to the normal function of the nervous system.

² Vitamin B12 and folate have a function in cell division.

WHAT MAKES **Doloctan® forte** SPECIAL?

With **Doloctan® forte** we deliberately focus on a careful selection of vital substances. The patented folic acid Quatrefolic® can be absorbed particularly easily in the body. This means that the vitamin is quickly available to the body after ingestion. The methylcobalamin used is also the natural and bioactive form of vitamin B12 and can therefore be directly utilized. The combination with the nucleotide uridine monophosphate makes the synergy of the active ingredients perfect.

INGREDIENTS

Bulking agent: microcrystalline cellulose, sodium salts of uridine monophosphate, hydroxypropyl methylcellulose (capsule), antioxidant: ascorbyl palmitate, (6S)-5-methyltetrahydrofolate glucosamine salt (Active Folate (Quatrefolic®)), methylcobalamin (vitamin B12).

DIRECTION FOR USE

Take 1 capsule daily with sufficient liquid. Long-term and regular intake is recommended. If required, the capsule can also be opened and the powder consumed directly.

ALL THE ADVANTAGES OF **Doloctan® forte**

- Without magnesium stearate
- Specially formulated bioactive body-identical nerve building blocks
- Only 1 capsule per day
- Without artificial colors and flavors
- Also suitable for vegans

IMPORTANT NOTE

Food supplement with uridine monophosphate (UMP), active folate (Quatrefolic®) and vitamin B12 in the form of methylcobalamin. The recommended daily intake must not be exceeded. This product is not a substitute for a balanced and varied diet and a healthy lifestyle. Keep out of the reach of children. Store in a cool and dry place.

NUTRITIONAL INFORMATION

PER CAPSULE*:

Uridinmonophosphat (UMP)	50 mg
Folic acid (Quatrefolic®)	400 µg (200 %**)
Vitamin B12 (methylcobalamin)	3 µg (120 %**)

*recommended daily intake **reference values according to LMIV
